

July 1 - July 5

- The OSSAA decided at the July 9th board meeting to negate the dead period for this year.
- The Bridge Creek Administrative team has decided to have a "Dead Period" at this time period and will follow the same rules as the OSSAA "Dead Period". No athletic activities will be allowed during this period. Nor will any contact between athletes and coaches or between athletes and school facilities be allowed.

July 6 - July 31

- No restrictions assuming state has progressed out of the re-opening phase back to "normal" operation. This may continue to include scrimmages against other schools and or practices/open gym/etc.
- The ability to have fans/spectators at events during this period will be announced at a later date based on the re-opening progress of the state.
- July 15th is the start date for fall sports in terms of practice (with the exception of football) ... make sure nothing you are doing for a sport after this date will be detrimental to our athletes that participate in fall sports.
- You are allowed to have small groups doing things during this time period as open gyms, batting cage work, skill development, but those activities should not be detrimental to an athlete participating in a fall sport and they should not be full team practices with the coaches providing instruction.
- Practice Dates:
 - July 15th - Fast Pitch Softball & Cross Country
 - August 10th - Football
 - October 1st - Basketball, Wrestling
 - December 1st - Baseball, Golf, Track & Field, & Soccer

2019 - 2020 Physicals are sufficient for this summer but will be requiring new physicals before July 15th for the 2020 - 2021 school year. We are in the works with our usual doctors for setting up a physical date at the school before July 15th.

The risk to have contact with individuals, who have been exposed to and/or have been diagnosed with one or more communicable diseases, including but not limited to COVID - 19 or other medical conditions, diseases, or maladies **does exist**, and it is impossible to eliminate the risk that a person could be exposed to and/or become infected through contact with or close proximity with an individual with a communicable disease.

With this assumed risk, parents should know we are taking every precaution necessary to provide the safest environment for our students and staff.

Sincerely,

David Morrow, Superintendent
